

Best 50 — Olim Villa-Community Opportunities, North of Tel Aviv

Consolidated from the full mandate · 13 July 2026 · **Target:** 10–30+ detached/semi homes in one community, for immigrant families (French + Anglo), NORTH of TLV ≤45 min (Tier 2 to ~60 for exceptional), built / building / pre-construction-with-permits, best appreciation potential · Every entry 10+ homes · **HIGH** verified/strong · **MED** qualify by call · **DD** verify · Drive times off-peak.

The combined thesis. Netanya is Israel's French-aliyah capital; the Anglo Sharon anchors on Even Yehuda's American International School and Tel Mond's Mevasser Zion community. The community goes in the **Kfar Yona–Even Yehuda–Tel Mond–Kadima belt** (10–15 min inland of Netanya's immigrant pool), where detached product, growth plans and affordability align — with the Sharon moshavim as the under-the-radar extension. Prestige north (Kfar Shmaryahu/Herzliya) and Tier-2 north (Caesarea/Zichron) included where the real-estate case is exceptional.

Two buyer levers + one structural rule. (1) **Oleh purchase tax** ~0.5%/5% vs 8–10% foreign ≈ ₪450K saved on a ₪10M home. (2) **GoodHouse rental fallback** de-risks pre-aliyah buyers. (3) **Buy in municipal TOWNS, not moshav expansions:** post-2024 (Strock amendment) moshav-expansion plots are allocated tender-exempt *only to individuals with no other land rights* — this structurally blocks a fund from acquiring a block, on top of acceptance-committee friction. Towns (Kfar Yona, Even Yehuda, Kadima, Pardesiya, Tel Mond) have neither gate. **Signal:** a francophone community is already forming inland — kfar-yona.fr + a Chabad Francophone in Kfar Yona — not just on the Netanya coast.

★ BEST 10 FOR THE THESIS — ranked (the answer)

Composite score /10: olim-community fit × cluster feasibility (10–30) × real-estate potential × stage-readiness × execution risk × proximity (north ≤45 favored).

E · MOSHAV / KFAR EXPANSIONS — under-the-radar, but DEPRIORITIZED for a fund (39–48)

⚠ **STRUCTURAL:** post-2024 (Strock amendment) expansion plots are allocated tender-exempt **only to individuals with no other land rights** — a fund cannot buy a block off-the-shelf; plus 98-yr RMI leasehold + acceptance committee (compatibility filter). Viable only via (a) open-tender RMI lots, or (b) a bespoke pre-negotiated tranche with a specific agudah. Kept for completeness & the nachala-prestige play (#39); lead with towns (Cat A-C) instead.

Recommendation. Anchor in a **municipal town** (no acceptance committee, no fund-allocation bar): lead with **HaMoshava, Even Yehuda** (#1) — permit-in-hand, gated, olim-anchored, take 10-30 — paired with **Kfar Yona / Nof HaSadot** (#2-3) for the young-immigrant-family value-appreciation play. Use **America-Israel** (Pardesiya, #9 — an olim-facing developer) or **Azorim** (YAROK) as build partners where the play is land+turnkey. **SADOT** (freehold custom, American School), **The Park EY** (#8, tripling town) and **Kfar Yona West** (francophone forming inland) are the growth plays; **VILLAE** the premium enclave; **Caesarea** + **Kfar Shmaryahu's 88 lots** the Tier-2/future flagship. **Deprioritize moshav expansions** — a fund can't acquire a block of expansion plots; enter only via open-tender lots or a bespoke agudah deal. **Every entry supports 10+ homes.** Off-axis items (Rosh HaAyin east; Modi'in/Mazkeret/Gan Yavne/Ashkelon south) flagged, kept only for exceptional merit.
