

Sharon Olim-Community Corridor — Ranked Acquisition Shortlist

Focused for the actual thesis: a branded villa community of 10–30+ homes for immigrant families (French + Anglo olim), NORTH of Tel Aviv, ≤45-min drive · 13 July 2026 · Confidence: HIGH verified/strong · MED qualify by call · DD verify · Drive times off-peak.

Why this zone. Netanya is Israel's French-aliah capital (French aliyah +45% in 2025); the Anglo Sharon anchors on Even Yehuda's **American International School** and Tel Mond's Mevaser Zion community. But Netanya city itself is towers — so the **community goes inland**, 10–15 min from the Netanya immigrant pool: the Kfar Yona–Even Yehuda–Tel Mond–Kadima belt, where detached product, growth plans and affordability line up. This is exactly the "outside Netanya / near Kfar Yona / open to moshavim" zone.

The two buyer levers (build into the offer). (1) **Oleh purchase tax** ~0.5%/5% vs 8–10% foreign — ≈₪450K saved on a ₪10M home; time the aliyah to the purchase. (2) **GoodHouse rental fallback** on every home de-risks absentee/pre-aliyah buyers. **Moshav caution:** most kfarim = 98-yr RMI leasehold + acceptance committee (ועדת קבלה) that can gate foreign buyers — flagged per row below; town projects (freehold/standard) avoid this.

TIER 1 · TOWN PROJECTS — the community-build candidates (≤45 min, 10–30+ homes)

Ranked by fit for an olim community × real-estate potential. Score /10 weighs: cluster feasibility (10–30), olim demand fit, growth/appreciation, stage/readiness, execution risk.

TIER 2 · MOSHAV / KFAR EXPANSIONS in the corridor — with the foreign-buyer gates flagged

⚠ Acceptance committee (ועדת קבלה) can screen buyers on community/Zionist criteria — a real hurdle for foreign olim; open-tender (RMI) lots bypass it. Nearly all are 98-yr RMI leasehold, not freehold. Verify both per site before any client conversation.

RECOMMENDATION — where to build the olim community

Lead: HaMoshava, Even Yehuda (#1, score 8.7). It is the best single answer to this exact brief: a **permit-in-hand, gated 54-villa community** you can enter now and take 10–30 units of, in a cluster-9 town that already hosts the **American International School** and an approved tripling of the town — 30–35 min north of Tel Aviv, minutes from Netanya's French pool and the Anglo Sharon. It needs no zoning bet and no acceptance committee. First call: Shatit *5750 — confirm detached share, remaining units, price, and pool feasibility.

Pair it with a value-appreciation play. If the priority is young immigrant families + best upside + "near Kfar Yona," run **Village Sharona / Nof HaSadot (Kfar Yona–Kadima belt, #2–#3)** in parallel — lower prices, the strongest verified appreciation in the radius, and growth towns absorbing families. **SADOT (#5)** is the freehold, committee-free custom-build option beside the American School. **VILLAE (#6)** is the premium 12-home enclave for the wealthier executive-oleh tier. Avoid leading with moshav lots (Tier 2): the acceptance-committee + leasehold layer is a friction you don't need for a first community — revisit them only via open-tender lots.

How this improves on the 100-item directory: filtered to the ≤45-min north-of-TLV olim zone; re-scored on immigrant-community fit × real-estate potential (not luxury prestige); adds the olim-tax lever, the French/Anglo community anchors, and the acceptance-committee/tenure gate per moshav. **Open verification (first calls resolve):** HaMoshava detached share & price · Village unit mix & availability · Nof HaSadot detached-block terms · Mondo remaining inventory · moshav committee/tenure specifics. A live enrichment sweep of new French/Anglo-targeted projects in this exact corridor is running — any additions will be folded in. All contacts verified-published; drive times off-peak — commission a peak-hour study before LOIs.
